

# VINYLUX™ Polish System Application and Removal

**30 MIN** VINYLUX weekly polish is polish reinvented! The self-adhering color coat eliminates base coat allowing for faster service time while the top coat's durability is increased with natural light allowing 7+ days of flawless color!

## Application:

### **STEP 1:** P.E.P.

#### 1. **P - Perform** a manicure.

a. Have the client wash their hands with soap and water and towel dry.

b. Massage **CoolBlue™** into the client's hands to cleanse skin and help prevent transmission of germs.

c. Remove any existing nail color from the natural nail using an acetone-based polish remover (**CND Shellac™ Nourishing Remover** or **ScrubFresh™**) and a plastic-backed lint-free pad.

d. If necessary, trim the length from each nail, using nail clippers.

e. Shape the extension edge of each nail with the **240-grit side of a Kanga™ File** or **Koala Buffer™**.

f. Apply a small amount of **CuticleAway** evenly around the cuticle of each nail.

g. Gently slide a **cuticle pusher** along the nail plate toward the cuticle area and along the lateral folds to lift and loosen any non-living tissue from the nail plate. Remove any excess **CuticleAway** from the nail and use a **curette** to remove non-living tissue up to the eponychium and lateral folds.

h. **Scrub** nails thoroughly with soap and a damp brush, then rinse with warm water to remove the cuticle remover and soap; towel dry.

i. Use a **manicure nipper** to carefully remove any loosened, non-living tissue, as well as any loose pieces of skin or hangnails. Use a gentle touch during cuticle removal to protect the seals. Never cut living tissue as it can lead to infection.

2. **E - Eliminate** surface contaminants and **P - Purify** nail plate layers.

- a. Thoroughly cleanse and temporarily dehydrate the nail plate layers with **ScrubFresh™** using a lint-free, plastic-backed pad. Gently pull lateral folds back and scrub thoroughly to be sure all areas of the nail are completely clean.

**STEP 2:**

## VINYLUX™ Weekly Polish Application\*

### Solid Color:

1. Shake the bottle vigorously to blend.

2. Apply one thin layer to each **nail surface** and **extension edge**.

- a. Remove the applicator brush from the bottle and wipe it against the bottle's neck to drain excess product from the brush.
- b. Hold the brush parallel to the natural nail and place the brush in the center of the nail slightly away from the cuticle line.
- c. Gently push the brush toward the cuticle line and glide down one side of the nail toward the extension edge of the nail.
- d. Lift the brush and repeat on the other side of the nail, followed by the same steps to coat the center. Leave a tiny free margin around the sidewalls and cuticle area of the nail to avoid color flowing into the eponychium and sidewalls.

- e. Be sure to seal the extension edge to ensure long wear.

- f. Detail the surrounding skin with **ScrubFresh** and a **CND ProSeries Gel Flat Oval Brush #6** if color gets on skin.

3. Apply a second thin layer to the surface and extension edge using the same process.

### French Manicure:

1. Shake the bottle vigorously to blend.

2. Apply one thin layer of your chosen pink color on the **nail surface** and **extension edge**.

- a. Remove the applicator brush from the bottle and wipe it against the bottle's neck to drain excess product from the brush.
- b. Hold the brush parallel to the natural nail and place the brush in the center of the nail slightly away from the cuticle line.
- c. Gently push the brush toward the cuticle line and glide down one side of the nail toward the extension edge of the nail.
- d. Lift the brush and repeat on the other side of the nail, followed by the same steps to coat the center. Leave a tiny free margin around the sidewalls and cuticle area of the nail to avoid color flowing into the eponychium and sidewalls.
- e. Be sure to seal the extension edge to ensure long wear.

3. Apply a second thin layer if more coverage is desired.

4. Apply a thin layer of white color to the tips of the nails, in an arched smile line to flatter the nail shape. Carefully detail with a gel oval brush lightly dampened with **ScrubFresh** to perfect the smile line.

\*Note: VINYLUX features adhesion promoters in the color coat that deliver 7 days of chip-free wear and eliminate the need for base coat. Applying base coat will create a barrier between the color layer and nail plate and will not ensure 7-day wear.

### STEP 3:

## VINYLUX™ Weekly Top Coat Application

1. Apply one thin layer to each **nail surface** and **extension edge**.

- a. Remove the applicator brush from the bottle and wipe it against the bottle's neck to drain excess product from the brush.
- b. Hold the brush parallel to the natural nail and place the brush in the center of the nail slightly away from the cuticle line.
- c. Gently push the brush toward the cuticle line and glide down one side of the nail toward the extension edge of the nail.
- d. Lift the brush and repeat on the other side of the nail, followed by the same steps to coat the center.
- e. Be sure to seal the extension edge to ensure long wear.

2. After five minutes, condition the nails and surrounding soft tissue and increase set time with a light mist of **SolarSpeed Spray™**.

### Removal:

#### STEP 1:

## VINYLUX Color Removal

1. Have the client wash their hands with soap and water and towel dry.

2. Massage **CoolBlue™** into the client's hands to cleanse skin and help prevent transmission of germs.

3. Saturate a plastic-backed, lint-free pad with **CND Shellac™ Nourishing Remover**. Place pad on the nail plate only and hold for five seconds.

4. Use firm pressure along with a circular motion to remove the color from the nail plate. Be sure to concentrate the pad on the nail and avoid the surrounding skin.

5. Rub the nail with a plastic-backed, lint-free pad saturated with **CND Shellac Nourishing Remover** to remove any residue.
